

PANEL 1
ACCELERATING THE SDGs IN CITIES: URBAN PROFESSIONS AND GOVERNANCE

Hayes Slade, Founding Partner, Slade Architecture
President AIA NY

Where we stand: climate action

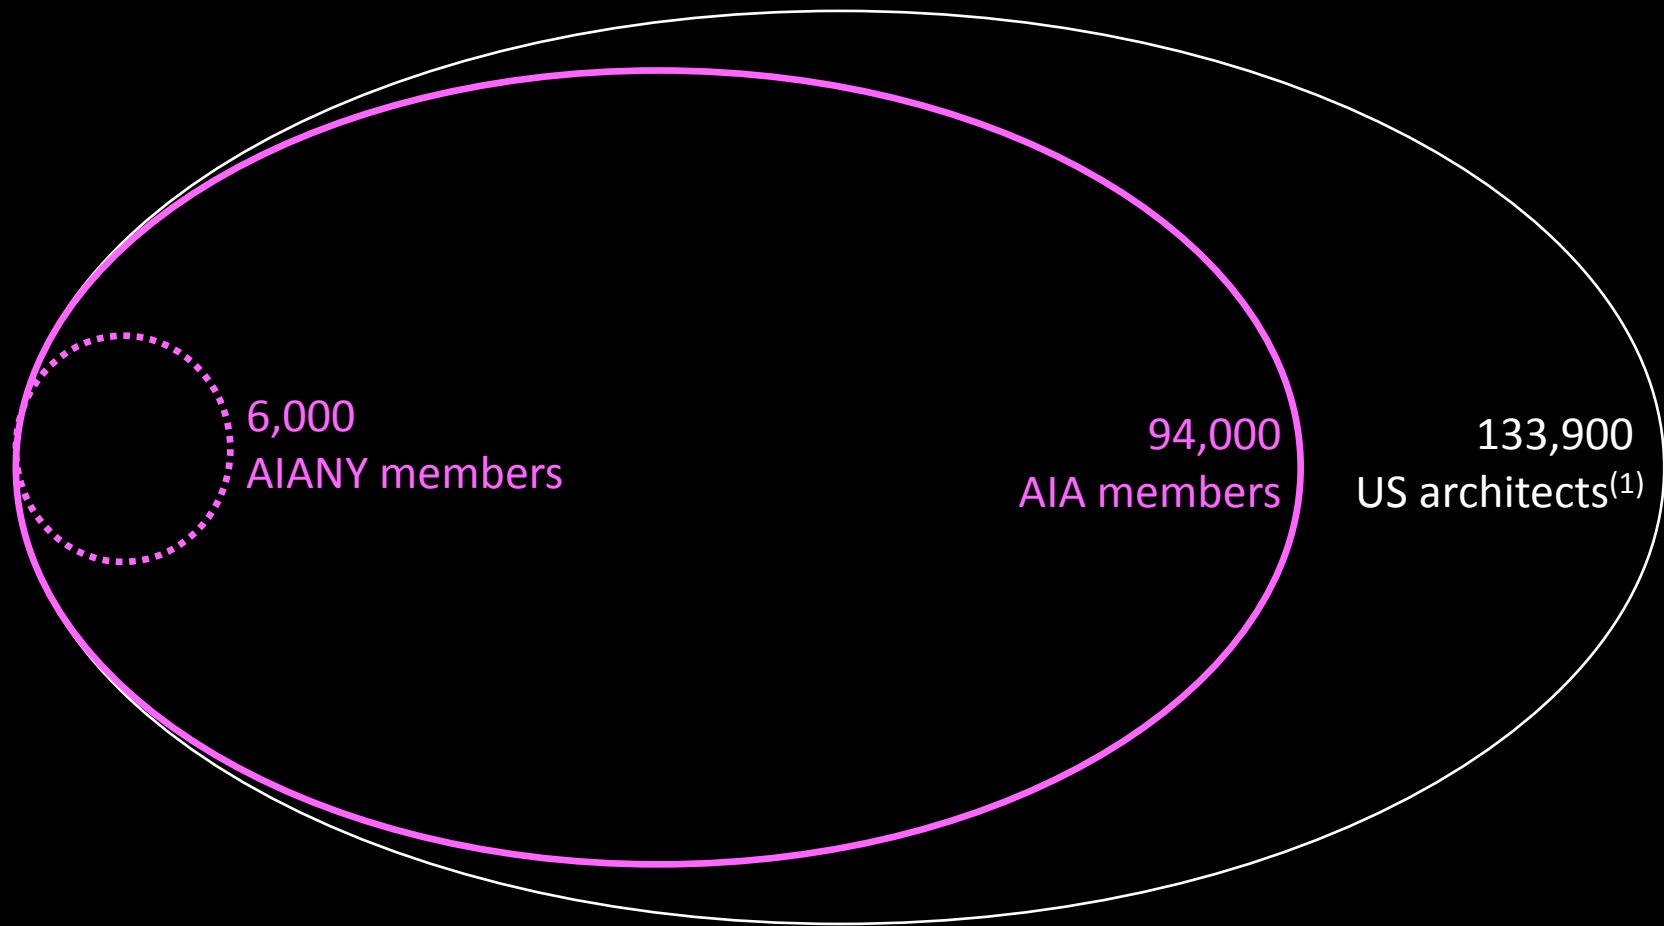

AIA ratified the Resolution for Urgent and Sustained Climate Action and has adopted the Framework for Design Excellence.

AIA is developing the necessary resources to prepare architects to achieve a zero-carbon, resilient, and healthy built environment.

AIA is spearheading changes to building codes and materials guidelines in the public and private sectors.

AIA will partner with policymakers and allies to expedite policy and practice resources that effectively address climate change.

AIA will activate its 94,000 members to vigorously advocate for policies that promote resilient design and dynamically curtail buildings' harmful impact to the climate.

Sustainable Development Goals

GOAL 1: No Poverty
GOAL 2: Zero Hunger
GOAL 3: Good Health and Well-being
GOAL 4: Quality Education
GOAL 5: Gender Equality
GOAL 6: Clean Water and Sanitation
GOAL 7: Affordable and Clean Energy
GOAL 8: Decent Work and Economic Growth
GOAL 9: Industry, Innovation and Infrastructure
GOAL 10: Reduced Inequality
GOAL 11: Sustainable Cities and Communities
GOAL 12: Responsible Consumption and Production
GOAL 13: Climate Action
GOAL 14: Life Below Water
GOAL 15: Life on Land
GOAL 16: Peace and Justice Strong Institutions
GOAL 17: Partnerships to achieve the Goal

FORCED LABOR, FORCED OUT

A new group of experts wants to eradicate modern slavery in the built environment

By SYDNEY FRANKLIN • September 4, 2019

The Grace Farms Foundation Architecture + Construction Working Group aims to expose modern slavery within architecture, construction, and manufacturing. (Courtesy Petros N. Zouzoulas/Creative Commons)

This article appears in the September print edition of The Architect's Newspaper.

The [2018 Global Slavery Index](#) estimated that 24.9 million people around the world are enslaved in [forced labor](#). Although the practice underpins much of the global 21st-century building economy—for example, the index noted that of all imports to the United States that are at risk of being produced under conditions of modern slavery,

Value of Active DDC-Managed Capital Projects

TOTAL \$ VALUE: \$13.5B TOTAL NUMBER OF ACTIVE PROJECTS: 834

FOCUS AREAS

Internal process analysis highlighted several areas where opportunities for improved project delivery exist.

Business Process and Organization

DDC can resolve many challenges to project delivery by implementing industry best practices in project management. Streamlining internal agency processes and management practices can help avoid delays at each stage of delivery.

Regulation and Oversight

Public capital procurement is heavily regulated at local, state, and federal levels, limiting the ability for City agencies to draw upon a fuller spectrum of project delivery tools that consider project type and complexity.

DDC is working with City partners to identify high-impact reforms to the City Charter, Procurement Policy Board Rules, City Administrative Code, and State law. DDC is also subject to oversight by several external entities who review and approve contract materials and authorizations for payment. While oversight is necessary to ensure that City agencies conduct business in compliance with all relevant laws, there are opportunities to accelerate and reduce redundancy in reviews.

Project Sponsor Management

DDC strives to provide quality capital project delivery services to its project sponsors, but project manager/sponsor relationships have been inconsistent. This has led to project initiation with incomplete scopes, planning with insufficient project funding, and late-stage project scope change acceptance.

Utility Coordination

Enhanced coordination with utilities including Con Edison, National Grid, and telecommunications providers, from project conception through construction could improve project delivery and lead to cost and time savings.

Elements of Infrastructure
